This course examines the nature of happiness from sociological, psychological, and philosophical points of view. Based on research in happiness measures of the Organization for Economic Cooperation and Development (OECD) and the United Nations, the course looks at the relationship between happiness and health, happiness and economic prosperity, happiness and social structures of the family and community, as well as reflections on the philosophy of happiness: What is happiness? How can happiness be measured? 課程目標與學習成效

Course Objectives & Learning

Outcomes

My philosophy of education is the teacher-student / student-teacher model: teachers are students, and students are teachers. So, all members of the classroom community are responsible for the success of the class: attendance is expected, verbal participation is encouraged, and student-teachers demonstrate respect for one another.

課堂規則

我的教育理念是“老師是學生/學生是老師”的模式。因此，課堂班級的所有成員負責課程的成功。預計上課，鼓勵口服參與，並老師學生演示對彼此的尊重。
